AFIQ HAIKAL BIN MOHD ASRI

Target role: Web Developer or Junior Software Developer/Engineer

Petaling Jaya, Selangor, Malaysia | +60 12-754 3270 | afiqztremo09@gmail.com
Portfolio: bearhauzz-portfolio.vercel.app | GitHub: github.com/bearsoleh
LinkedIn: linkedin.com/in/afiq-haikal-43141531b

PROFESSIONAL SUMMARY

Computer Science graduate and web developer with hands-on experience delivering client websites, Laravel/MySQL content systems, React interfaces and custom Shopify Liquid storefronts. Completed inherited projects through launch, resolved production issues and supported Flutter application releases. Seeking a web developer or junior software developer/engineer role to contribute practical development and debugging experience, deepen backend skills and grow into full-stack development.

TECHNICAL SKILLS

Backend and databases: PHP, Laravel, MySQL, authentication, role-based workflows, content management systems

Frontend: JavaScript, TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS, responsive web design

Platforms and mobile: Shopify Liquid, WordPress (Elementor, Breakdance), Framer, Wix, Flutter

Tools and delivery: GitHub, Docker, OrbStack, SSH, phpMyAdmin, cPanel, Netlify, VS Code

Quality: Debugging, cross-device testing, functional testing, user acceptance testing, staging and deployment

AI-assisted development: Codex and Claude for code editing, debugging and local testing

PROFESSIONAL EXPERIENCE

Management Trainee - Web Development (Contract)

GoViral Lab | June 2026 - Oct 2026 | Petaling Jaya

- Developed and improved seven client and company websites across Laravel, Shopify, Framer, WordPress and custom code; handled client amendments, responsive QA, staging and deployment.
- Built a Laravel and MySQL CMS for MyPATH so the team could create, update and manage job listings and candidate testimonials.
- Took over Vastiq Solutions and completed its remaining development within one month; launched the site on its own domain through cPanel. Completed and launched Why Travel & Tours on Framer within two months.
- Translated a Framer template design into HTML, CSS, JavaScript and React for the company website.
- Built every storefront section for Pferd and Janine with custom Shopify Liquid code and configurable theme settings. Integrated Janine form submissions with a Railway-hosted service that sends email notifications.
- Recreated Upstairs locally from its database and public_html files using Docker and OrbStack. Used AI to edit and test code, transferred files through SSH and imported the database through phpMyAdmin.

Junior Web Developer

Construction Professionals Malaysia | Jan 2026 - May 2026 | Sungai Petani

- Developed and maintained responsive WordPress websites with Breakdance, improving pages, UI, SEO fundamentals and performance.
- Recovered compromised WordPress installations by removing injected scripts, restoring clean backups and strengthening security after phishing redirects.
- Maintained a Flutter application through UI improvements, bug fixes, functional testing and release support for Android and iOS.

PROFESSIONAL EXPERIENCE (CONTINUED)

Program Executive - Digital Media

Mega Jati Academy Sdn Bhd | May 2025 - Jan 2026 | Shah Alam

- Managed Wix website content for training programmes and corporate events; maintained Flutter application content and supported testing and troubleshooting.
- Coordinated programme requirements, registration materials and participant communications.

Shopify Web Developer Intern

Homy Villa (Borneo) Sdn Bhd | Oct 2024 - Jan 2025 | Kuala Lumpur

- Customised Shopify Plus themes with Liquid, HTML, CSS and JavaScript; maintained Shopify and WordPress storefronts and supported cross-device testing.
- Supported product updates, Shopify POS, B2B pricing workflows and e-commerce troubleshooting.

SELECTED TECHNICAL PROJECTS

BearHauzz - Personal Portfolio

Personal project | Next.js, React, TypeScript, Tailwind CSS, Git, GitHub

- Built a responsive portfolio with reusable React components and shared project data for consistent project listings and case studies.
- Implemented statically generated project pages, page metadata and responsive images in Next.js, plus keyboard-accessible galleries, focus restoration and reduced-motion support.
- Maintained source history with Git and verified production builds.

GoViral Lab - Company Website

Company project | HTML, CSS, JavaScript, React, Netlify

- Translated a Framer template design into HTML, CSS, JavaScript and React for the company website.
- Corrected tablet and mobile layouts, improved readability and added a floating WhatsApp button; deployed on Netlify using the company's own domain.

https://govirallab.com/

Vastiq Solutions - Corporate Website

Client project | HTML, CSS, JavaScript, cPanel

- Completed an inherited corporate website within one month, covering company information, AI solutions, governance, robotics, projects and events.
- Resolved navigation, content and responsive issues through client review; deployed through cPanel on the client's own domain with backups and post-launch checks.
