Portfolio: bearhauzz-portfolio.vercel.app | GitHub: github.com/bearsoleh
LinkedIn: linkedin.com/in/afiq-haikal-43141531b

PROFESSIONAL SUMMARY

Web developer and Computer Science graduate with experience building Laravel/MySQL applications, React interfaces and custom Shopify storefronts. Delivered client website updates, recovered compromised WordPress sites and supported Android and iOS application releases. Seeking a Web Developer or Junior Software Developer/Engineer role.

TECHNICAL SKILLS

Backend & databases: PHP, Laravel, MySQL, authentication, role-based workflows, content management systems
Frontend: JavaScript, TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS, responsive web design
Platforms & mobile: Shopify Liquid, WordPress (Elementor, Breakdance), Framer, Wix, Flutter
Tools & delivery: Git, GitHub, Docker, OrbStack, SSH, phpMyAdmin, cPanel, Netlify, VS Code
Testing & quality: Debugging, cross-device testing, functional testing, user acceptance testing, staging and deployment
AI-assisted development: Codex and Claude for code editing, debugging and local testing

PROFESSIONAL EXPERIENCE

Management Trainee - Web Development (Contract)

GoViral Lab | Jun 2026 - Oct 2026 | Petaling Jaya

- Developed and updated seven client and company websites across Laravel, Shopify, Framer, WordPress and custom code, from client revisions to responsive testing and deployment.
- Built a Laravel and MySQL CMS for MyPATH with features to create and update job listings and candidate testimonials.
- Took over Vastiq Solutions and completed its remaining development within one month. Completed Why Travel & Tours on Framer within two months and launched both sites on their own domains.
- Rebuilt the company website from a Framer template using HTML, CSS, JavaScript and React, with layouts for desktop, tablet and mobile.
- Built all Pferd and Janine storefront sections with custom Shopify Liquid and editable theme settings. Connected Janine's forms to a Railway-hosted service for email notifications.
- Set up a local copy of the Upstairs WordPress site using Docker and OrbStack for development and testing. Transferred files through SSH and imported the database through phpMyAdmin.

Junior Web Developer

Construction Professionals Malaysia | Jan 2026 - May 2026 | Sungai Petani

- Built and maintained responsive WordPress websites using Breakdance, updating page layouts, on-page SEO and performance.
- Recovered WordPress websites affected by phishing redirects by removing malicious scripts, restoring clean backups and updating security settings.
- Updated Flutter application screens, fixed bugs and tested functionality to support Android and iOS releases.

PROFESSIONAL EXPERIENCE (CONTINUED)

Program Executive - Digital Media

Mega Jati Academy Sdn Bhd | May 2025 - Jan 2026 | Shah Alam

- Updated Wix website and Flutter application content for training programmes and corporate events; supported application testing and troubleshooting.
- Prepared registration materials and coordinated programme requirements and participant communications.

Shopify Web Developer Intern

Homy Villa (Borneo) Sdn Bhd | Oct 2024 - Jan 2025 | Kuala Lumpur

- Customised Shopify Plus themes using Liquid, HTML, CSS and JavaScript; maintained Shopify and WordPress storefronts and tested layouts across devices.
- Supported product updates, Shopify POS, B2B pricing workflows and e-commerce troubleshooting.

SELECTED TECHNICAL PROJECTS

CampusSphere - Campus E-Marketplace

Final-year project | PHP, Laravel, MySQL, HTML, CSS, JavaScript

- Developed a marketplace for UiTM Arau with separate buyer, seller and administrator workflows using Laravel and MySQL.
- Implemented authentication, product management, search and filtering, shopping cart and order management.
- Built payment receipt uploads and seller approval workflows for payments completed outside the website.
- Evaluated the system through user acceptance testing (UAT) with 33 participants.

BearHauzz - Personal Portfolio

Next.js, React, TypeScript, Tailwind CSS, Git, GitHub

bearhauzz-portfolio.vercel.app

- Built a responsive portfolio with reusable React components and shared project data for project listings and case studies.
- Generated project pages at build time and added page metadata and responsive images in Next.js.
- Added keyboard navigation, focus restoration and reduced-motion support to galleries; checked production builds before deployment.

Vastiq Solutions - Corporate Website

HTML, CSS, JavaScript, cPanel

www.vastiqsolutions.com

- Fixed navigation and responsive layout issues across pages covering AI solutions, governance, robotics, projects and events.
- Published website files through cPanel and completed backups and post-launch checks on the client's domain.

EDUCATION

Bachelor of Computer Science (Hons.) - Netcentric Computing

Universiti Teknologi MARA (UiTM), Arau Campus | Oct 2021 - Apr 2025
